Crane operation with side inclination

Utilisation de la grue en inclinaison latérale

Additional operational possibilities are offered by the load charts programmed as standard for working with main boom and assembly jib on surfaces with an inclination up to 4°. To ensure high capacities also under these conditions the sheaves at the boom head and the assembly jib are manufactured from steel.

Les possibilités d'application de la grue sont étendues grâce aux tableaux des charges programmés de série permettant d'utiliser la grue avec une inclinaison latérale pouvant aller jusqu'à 4°. Les poulies montées dans la tête de flèche et dans la fléchette de montage sont en acier afin de garantir des forces de levage élevées malgré la position inclinée.

Triple grouser track pads, Width 2 ft 11 in
Tuiles à 3 nervures, Largeur 2 ft 11 in

Option
Flat track pads, Width 2 ft 11 in
Tuiles plates, Largeur 2 ft 11 in

Great operational diversity

Grande polyvalence

High flexibility

Haute flexibilité

Due to its extraordinary cross-country mobility and the possibility to drive sensitively with full load, the LTR 1100 offers an extraordinary operation diversity.

Grâce à son excellent comportement en tout-terrain et sa souplesse de déplacement à pleine charge, la LTR 1100 permet une utilisation extrêmement flexible.

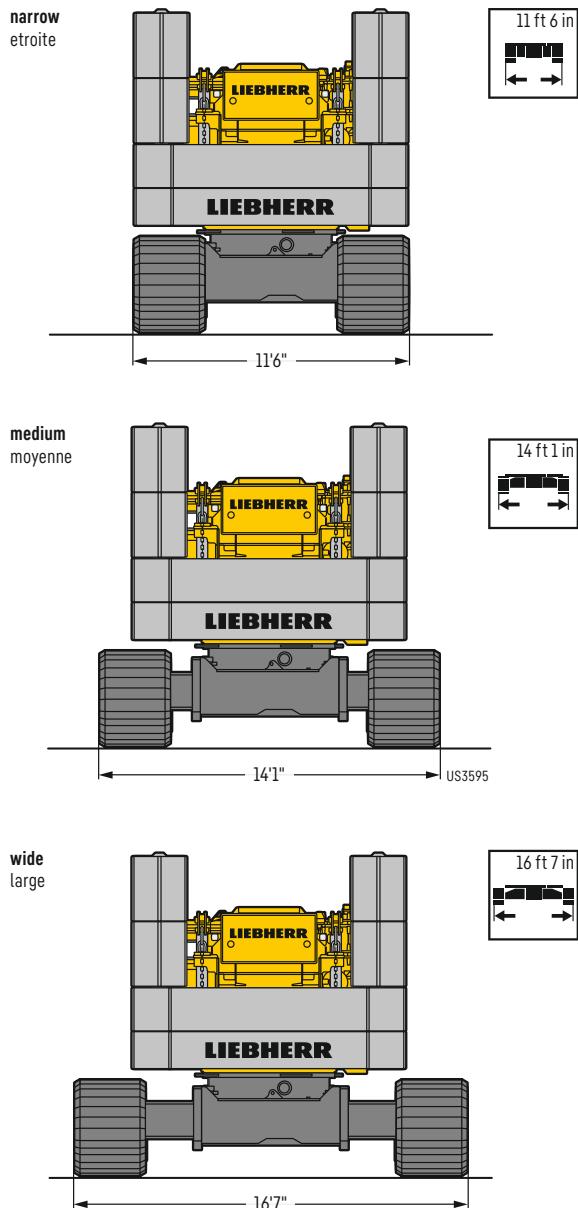

Telescopic crawlers

Longerons télescopables

The chassis of the LTR 1100 can be hydraulically telescoped from the chassis width of 11 ft 6 in to the intermediate width of 14 ft 1 in or the maximum width of 16 ft 7 in.

Additionally the LTR 1100 also operates on an asymmetric track. Thus the full capacity can be utilised when working over the side at which the crawler is fully extended.

Les longerons de la LTR 1100 peuvent être sortis hydrauliquement d'une largeur de 11 ft 6 in à une largeur intermédiaire de 14 ft 1 in, ou à la largeur maximale de 16 ft 7 in. Par ailleurs, la LTR 1100 travaille également sur voie asymétrique. La capacité peut ainsi être exploitée intégralement, lorsque la grue travaille du côté où le longeron est complètement sorti.

Equipment

■ Crawler travel gear

Frame	Low torsion box construction, consisting of crawler center section and two crawler carriers. The crawler carriers can be removed from the telescoping beams. Hydraulic track width adjustment.
Tracks	Maintenance free crawler tracks with 2 ft 11 in wide triple grouser track pads.
Travel drive	Per crawler carrier, a hydraulic travel drive consisting of an axial piston motor, planetary gear with spring-loaded hydraulically-releasable travel brake. The crawler chains can be controlled synchronously as well as independently and counter-rotating. Travel speed: 0 – 1.7 mph.
Central ballast	33,080 lb, placement blocks at 16,540 lb each, mounting on crawler center section.

▲ Crane superstructure

Frame	Liebherr-manufactured, torsionally rigid steel construction made from high-tensile fine-grain steel. Triple-roller slewing rim.
Crane engine	4-cylinder Diesel, make Liebherr, watercooled, output 129 kW (175 h.p.), max. torque 908 lb-ft. Exhaust emissions to (EU 2016/1628 and EPA/CARB or ECE-R.96, spark arrestor. Fuel reservoir: 192 gallons.
Crane drive	Diesel-hydraulic, with 2 axial piston variable displacement pumps, with servo-control and capacity control, 1 double gear pump, open controlled oil circuits. Compact hydraulic drive flanged to the Diesel engine. Drive assembly completely enclosed for noise abatement.
Control	Electric "Load Sensing" control, simultaneous operation of 4 working motions, 2 self-centering hand control levers (joy-stick type). The crawler travel gear is operated via the 2 two-way controllable foot pedals. The crawler travel gear and the crane superstructure can be driven simultaneously.
ECOmode	Automatic adaption of the diesel engine speed, fuel saving and reduction of the noise emission.
Hoist gear	Axial piston fixed displacement motor, Liebherr hoist drum with integrated planetary gear and spring-loaded static brake.
Luffing gear	1 differential ram with safety check valves.
Slewing gear	Axial piston fixed displacement motor, planetary gear, spring-loaded static brake, slewing gear invertible.
Crane cab	Large screen area, compound glass, comfort furnishing, cab tiltable backwards.
Safety devices	LICCON2 safe load indicator, test system hoist limit switch, safety valves to prevent pipe and hose ruptures.
Telescopic boom	1 base section and 5 telescopic sections. All telescopic sections extendable individually by means of the rapid-cycle telescoping system Telematik. Boom length 38 ft to 171 ft.
Counterweight	57,320 lb
Electrical system	Modern data bus technique, 24 Volt DC.
Lateral inclination	0.3°, 1.5°, 2.5° and 4° lateral inclination on tables for the telescopic boom and 9 ft 6 in folding jib.

Additional equipment

K	9 ft 6 in with steel cable pulleys.
K	Single folding jib, 35 ft Double swing-away jib 35 ft – 62 ft Mechanical adjustment 0°; 20°; 40°
NZK	Single folding jib, 35 ft Double swing-away jib 35 ft – 62 ft Hydraulic adjustment 0° – 40°
V	Telescopic boom extension 2 x 23 ft
2nd hoist gear	For two-hook operation or for operation with swing-away jib if the hoist rope shall remain reeved.
Additional counterweight	13,220 lb for a total counterweight of 70,540 lb.
Jack-up cylinder incl. folding brackets	For crawler removal, flatbed trailer transit height 3 ft 7 in, flatbed trailer transit width 9 ft 10 in.
Track pads	2 ft 11 in flat track pads

Other items of equipment available on request.

Equipement

Train de chenilles

Châssis	Construction en caisson indéformable haute résistance, constitué de la partie centrale du train de roulement et de deux longerons. Les longerons peuvent être démontés des poutres télescopiques. Réglage hydraulique de la voie.
Train de roulement	Train de roulement sans entretien, muni de tuiles à 3 nervures, de 2 ft 11 in de large.
Transmission	Une transmission hydraulique par longeron, comprenant un moteur à cylindrée variable et pistons axiaux, un réducteur planétaire avec frein à ressort et à déblocage hydraulique. Les chaînes sont synchrones, indépendantes et une commande inversée est possible. Vitesse de translation: 0 - 1.7 mph.
Contrepoids central	33,080 lb, blocs de suspension de 16,540 lb chacun, fixation sur la partie centrale du train de roulement.

Partie tournante

Cadre	Fabrication Liebherr, construction soudée indéformable, en acier à grain fin haute résistance. Couronne d'orientation à triple rangée de rouleaux.
Moteur	Moteur diesel Liebherr, 4 cylindres, à refroidissement par eau, de 129 kW (175 ch), couple max. 908 lb·ft. Emissions des gaz d'échappement conformes aux directives (EU) 2016/1628 et EPA/CARB ou ECE-R.96, pare-étincelles. Capacité du réservoir à carburant: 192 gallons.
Entraînement	Diesel hydraulique avec 2 pompes à débit variable à pistons axiaux, servocommande et régulation de la puissance, 1 double pompe à engrenages, circuits hydrauliques ouverts et régulés. Entraînement hydraulique compact, accouplé directement au moteur Diesel, mécanisme d'entraînement total fermé pour une bonne insonorisation.
Direction	Direction électrique «Load Sensing», 4 mouvements de travail dirigeable simultanément, deux leviers de commande à 4 positions et à autocentrage. Le train de chenilles est actionné par 2 pédales à double commande. Le train de chenilles et la partie tournante de la grue peuvent être déplacés simultanément.
Mode ECO	Adaptation automatique du régime du moteur diesel, économie de carburant et réduction des émissions sonores.
Mécanisme de levage	Moteur à cylindrée constante et à pistons axiaux. Treuil de marque Liebherr équipé d'un engrenage planétaire et d'un frein d'arrêt commandé par ressort.
Mécanisme de relevage	1 vérin différentiel avec soupapes de retenue.
Dispositif de rotation	Moteur à cylindrée constante à pistons axiaux, engrenage planétaire, frein d'arrêt commandé par ressort, mécanisme d'orientation commutable.
Cabine de grue	Large champ de vision, vitrage de sécurité, équipement pour un confort idéal, cabine inclinable vers l'arrière.
Dispositif de sécurité	Contrôleur de charge «LICCON2», système test limitation de la course pour le levage, soupape de sûreté contre la rupture de tubes et de tuyaux.
Flèche télescopique	Un élément de base et de 5 télescopes. Chaque partie peut être télescopée individuellement à l'aide du système de télescopage séquentiel rapide Telematik. Longueur de flèche: 38 ft - 171 ft.
Contrepoids	57,320 lb
Installation électrique	Technique moderne de transmission de données par BUS de données. Courant continu 24 Volts.
Inclinaison latérale	Inclinaison latérale de 0,3°, 1,5°, 2,5° et 4° avec les tableaux correspondants à la flèche télescopique et à la fléchette pliante de 9 ft 6 in.

Equipement supplémentaire

K	9 ft 6 in avec poulies de câble en acier.
K	Fléchette pliante simple, longueur 35 ft Double fléchette pliante 35 ft - 62 ft Réglage mécanique 0° ; 20° ; 40°
NZK	Fléchette pliante simple, longueur 35 ft Double fléchette pliante 35 ft - 62 ft Réglage hydraulique 0° - 40°
V	Rallonge flèche télescopique 2 x 23 ft
2ème mécanisme de levage	Pour l'utilisation du deuxième crochet, ou bien pour une utilisation avec fléchette pliante lorsque le câble de levage principal rest mouflé.
Contrepoids supplémentaire	13,220 lb pour un contrepoids total de 70,540 lb.
Vérin Jack-up, consoles rabattables incl.	Pour le démontage des chenilles, hauteur de passage des remorques surbaissées 3 ft 7 in, largeur de passage des remorques surbaissées 9 ft 10 in.
Tuiles	Tuiles plates de 2 ft 11 in

Autres équipements supplémentaires sur demande.

Description of symbols

Explication des symboles

	Max. capacity Capacité max.		No. of sheaves Poulies
	Max. hoist height Hauteur de levage max.		No. of lines Brins
	Max. radius Portée max.		Weight Poids
	Driving force Puissance propulsive		infinitely variable en continu
	Total weight Poids total		Radius Portée
	Ground pressure Pression au sol		Width crawler chassis Largeur du train de chenilles
	Driving speed Vitesse de translation		Slewing gear / Working area Mécanisme d'orientation / Plage de travail
	Gradability Aptitude à gravir les pentes		over front / over rear ±30° en avant / en arrière ±30°
	Rope diameter Diamètre		Counterweight Contrepoids
	Rope length Longueur du câble		Central ballast Contrepoids central
	Max. single line pull Effort au brin maxi.		Standard Norme
	Hoist gear Treuil de levage		Telescopic boom Flèche télescopique
	Slewing speeds Vitesses d'orientation		Swing away jib Flèche pliante
	Boom length Longueur de la flèche		Hydraulic swing away jib Flèche pliante hydraulique

	Hookblock/Capacity Moufle à crochet/Capacité de charge		Assembly jib Flèche de montage

Remarks

1. The lifting capacities do not exceed 75 % of the tipping load according to ASME B 30.5.
The crane's structural steelwork is in accordance with EN 13000 and ASME B 30.5.
2. For the calculation of the load charts at least a wind speed of 30 ft/s (9 m/s, 20 mph) and regarding the load a sail area of 1 m² per ton load and a wind resistance coefficient of 1.2 on the load have been taken into account. For lifting of loads with large sail areas and/or high wind resistance coefficients the maximum wind speed as stated in the load charts has to be reduced.
3. The lifting capacities stated are valid for lifting operation only (corresponding with crane classification according to ISO 4301-1, crane group A1).
4. Lifting capacities are given in kip.
5. The weight of the hook blocks and hooks is part of the load and therefore it must be deducted from the lifting capacities.
6. Working radii are measured from the slewing center.
7. The stated lengths of the telescopic boom are maximum values and may deviate slightly.
8. The lifting capacities given for the telescopic boom apply if the folding jib is removed.
9. Lifting capacities above 182,100 lb / 215,400 lb only with additional pulley block/special equipment.
10. Subject to modification of lifting capacities.
11. Lateral inclination ± 0.3°.
12. The data of this brochure serves only for general information. All information is provided without warranty. Instructions for the correct commissioning of the crane please take from the operation manual and the load chart book.
13. The pictures contain also accessories and special equipment not included in the standard scope of delivery.

Remarques

1. La capacité de charge ne doit pas dépasser 75 % de la charge de basculement conformément à ASME B 30.5. La structure métallique de la grue est conforme à EN 13000 et ASME B 30.5.
2. Une vitesse de vent de 30 ft/s (9 m/s, 20 mph) minimum, une surface de prise au vent de 1 m² par tonne ainsi qu'un coefficient de résistance au vent de la charge 1,2 sont pris en compte pour le calcul des tableaux de charge. Lorsque des charges ayant une surface de prise au vent et/ou un coefficient de résistance au vent plus élevé(e)s sont levées, la vitesse de vent maximale indiquée dans les tableaux de charge doit être réduite.
3. Forces de levage pour application de grue de montage (correspond à la classification de grues selon ISO 4301-1, groupe de grues A1).
4. Les charges sont indiquées en kip.
5. Le poids du crochet de levage resp. de la moufle à crochet est une partie de la charge et doit donc être déduit de la capacité de charge.
6. Les portées sont calculées à partir de l'axe de rotation.
7. Les longueurs indiquées pour la flèche télescopique sont des valeurs maximales et peuvent légèrement varier dans la réalité.
8. Les charges indiquées pour la flèche télescopique sont valables lorsque la fléchette pliante est démontée.
9. Les charges supérieures à 182,100 lb / 215,400 lb seulement avec moufle additionnel/équipement supplémentaire.
10. Charges données sous réserve de modification.
11. Inclinaison latérale ± 0,3°.
12. Les données de cette brochure sont données à titre informatif. Ces renseignements sont sans garantie. Les consignes relatives à la bonne mise en service de la grue sont disponibles dans le manuel d'utilisation et le manuel de tableaux de charge.
13. Les figures contiennent également des accessoires et des équipements spéciaux non inclus de série dans la livraison.
